

KENT®

MICA PANEL HEATER

Model No. KPE216-342

OWNERS INSTRUCTION MANUAL

Congratulations on your purchase of a Kent Portable Electric Appliance. Please read the following instructions carefully before use and retain for future reference.

BEFORE FIRST USE

- Read and follow all the instructions below even if you feel you are familiar with the appliance.
- Remove the packing and make sure that the appliance is in tact. If in doubt do not use the appliance and contact the place of purchase.
- Do not leave packaging materials such as bags and staples within reach of children.
- Dispose of packaging carefully and with consideration for the environment.
- It is ideal to retain the appliance carton for seasonal storage.

For your convenience record the date you received the appliance on the warranty page of these instructions, and attach your proof of purchase. Retain this information in the event that a warranty service is required.

NOTE: The rating of this appliance (as marked on the rating label) is based on specific loading tests. Normal use or the use of other recommended attachments may draw significantly less power.

IMPORTANT SAFETY INFORMATION

When using any electrically powered appliance, these basic safety precautions should always be followed.

WARNING: DO NOT COVER in order to avoid overheating.

- Do not cover or restrict airflow to the inlet or outlet grilles in any manner as the appliance may overheat and become a fire risk.
- This appliance heats up when in use. To avoid burns, do not touch the front of the appliance or any of the grilles or vents.
- Do not use the appliance to dry clothes.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- **CAUTION:** In order to avoid a hazard due to inadvertent resetting of the thermal cutout, this appliance must not be supplied through an external switching device, such as a timer, or connected to a circuit that is regularly switched on and off by the utility.

To reduce the risk of fire, electrical shock or injury to persons or property:

- To avoid overheating, keep airflow grilles clear of dust and hair build up - especially if you have indoor pets.
- Use only the voltage specified on the rating label of the appliance.

- Do not cover grilles, block entry or exits of airflow by placing the appliance against any surface. Keep all objects at least 1 metre from the front, side and rear of the appliance.
- Do not locate in areas of high foot traffic, ensure the power cord and heater are in view to avoid accidents.
- Do not operate in areas where gasoline, paint or other flammable liquids are used or stored.
- Before moving the appliance, switch off the appliance by unplugging it from the wall and allowing it to cool.
- Do not insert or allow foreign objects or metal utensils into any ventilation or exhaust openings as this may cause an electric shock, fire or damage to the appliance.
- Do not use this appliance in the immediate surroundings of a bath, a shower or a swimming pool.
- Do not immerse in liquid or use the appliance near water as this could create an electrical shock hazard.
- If the appliance accidentally comes into contact with water switch off the power supply and do not touch the appliance.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been dropped or damaged in any manner – in order to avoid a hazard. Return to a qualified electrical person for service or repair.
- Do not operate the appliance with wet hands.
- Do not connect the appliance to the mains voltage until completely assembled and adjusted.
- This appliance is not intended for outdoor use.
- Always operate upright, on a flat surface only.
- CAUTION: This product is NOT suitable to be used on long pile carpets or rugs.
- Unroll the cord before operating. Operating with a coiled cord may cause overheating and fire risk.
- **The use of an extension cord or multi plug with this appliance is not recommended.**
- Do not remove the plug from the power socket until the appliance has been switched off.
- Always hold the plug when removing it from the wall, do not pull the cord.
- Always unplug the appliance when it is not in use.
- Do not allow the cord to come in to contact with the appliance surface during operation.
- Do not run the cord under carpeting, mats or rugs etc. Arrange the cord away from traffic areas so that it will not be tripped over.
- Do not twist, kink or wrap the cord around the appliance as this may cause the insulation to weaken and split.
- Children should be supervised to ensure that they do not play with the appliance.
- This appliance is intended for light domestic use and not for heavy duty commercial or industrial use.
- The appliance must not be located immediately below or in front of a socket-outlet.
- Never remove the cover of the appliance – in case of a fault contact a qualified service person.
- Use this appliance only as described in this manual.
- Any other use is not recommended by the manufacturer and may cause fire, electric shock or injury.

Heater Specifications

Model No.: KPE216-342

Heat Settings: 750W / 1500W

Rating: 220-240V~, 50Hz

ASSEMBLY INSTRUCTIONS

This heater is supplied with both wall mounting brackets for fixed installation and wheels for portability.

Portable Assembly

1. Position the heater carefully upside down and slot the wheel assembly into the base of the heater at each end.
Note: Each wheel assembly is marked with 'L' or 'R' to indicate its location.
2. Turn the heater the right way up.
3. Place the heater on a level surface in a stable upright position.

The heater should only be operated at a minimum distance of 1 metre from any wall or other object. Position the heater in order to optimise the air flow of the room.

Fig 1.

Fixed Installation

Refer to the guide to correctly locate the heater. Ensure the wheel assemblies are removed and stored safely, if they are currently secured to the heater.

Check the voltage on the specification plate is the same as in your home.

1. Drill three 6mm diameter holes (A), (B), (C) in the wall using Fig. 2 as a guideline. To ensure the most secure location, affix to a stud.

Minimum Clearances & Positioning Guide

Fig 2.

ASSEMBLY INSTRUCTIONS

Fixed Installation Continued

2. Fix the three plastic rawl plugs supplied into the three holes in the wall.
3. Fix two screws supplied into two of the rawl plugs (A and B) leaving 5mm of the screw exposed to hang the heater (Fig. 3).

Fig 3.

4. Install the bracket onto the heater using the vacated wheel assembly bracket, as shown in Fig. 4. Insert a screw into the hole of the bracket and fix the screw into the remaining rawl plug (C).

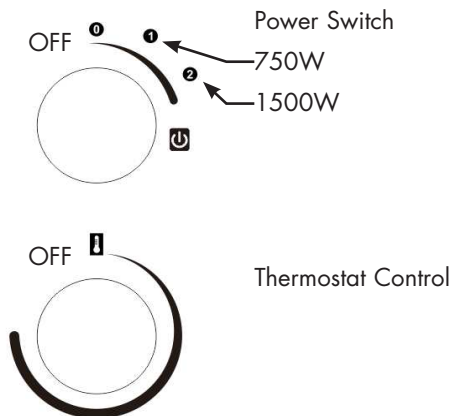

Fig 4.

5. Ensure the heater is securely fastened to the wall.

OPERATING INSTRUCTIONS

NOTE: When switched on for the first time a slight odour may be emitted for a few minutes. This is harmless and occurs with most appliances as slight traces of dust or lubricants may have collected during manufacture.

Thermostat Function

- Set the desired room temperature by turning the thermostat dial clockwise to the desired position. You may adjust the temperature during use. To turn down the thermostat turn the dial anti-clockwise.
- To find the ideal thermostat setting for you, first set the knob to the maximum position. As soon as the temperature is comfortable, turn the thermostat down slowly, until the heater turns off. The heater will keep the surrounding air at this set temperature by switching on and off at intervals.

- Ensure power switch is in the OFF position (O) and the thermostat is in the OFF position.
- Unwind the power cord and plug your heater into a power socket, ensuring you comply with minimum clearances. Ensure the voltage on the specification plate is the same as in your home and the power cord is lying safely on the ground.
- The orange indicator light will turn on if the heater is switched on at the wall.
- Switch the heater ON by selecting:
 - a. Power setting I – 750W
 - b. Power setting II – 1500W
- The heater operates when both the power switch and thermostat function are activated.

SAFETY FEATURES

Over-Heat Protection

- This heater is protected with an over-heat protection cut-out facility that switches it off automatically if it over-heats.
- Overheating can be caused by obstruction to the air intakes on the top of the heater or the grill on the front.
- If this occurs please disconnect the heater from the power socket and allow it to cool for 30 minutes. Remove any obstruction and turn the heater back on.
- The heater should operate normally. Should the problem persist contact your nearest service centre.

Safety Cut-Out Switch

- The heater is fitted with a safety cut-out switch to switch the heater off if it is knocked over.
- If the heater is knocked over and the cut-out switch activates turn the heater off at the power outlet and take EXTREME care when standing the heater upright as it will still be hot.
- Inspect the heater for damage especially to the heating elements and power cord.
- If any damage is visible do not operate the heater.

CLEANING AND CARE

IMPORTANT: Turn off the heater. Switch off the power switch and disconnect the heater from the power socket. Wait for the heater to be completely cool before cleaning.

Fixed Installation Only

Carefully dislodge the heater from the wall.

After cleaning, reattach the heater to its position on the wall.

- Vacuum clean air vents and grilles to remove dust from these areas.
- To remove dust on external surfaces, wipe the heater with a damp (not wet) lint-free cloth rinsed in hot soapy water only.
- Do not use any harsh detergent or abrasive cleaners.
- Do not spray with liquids or submerge in liquids or water.
- Do not attempt to clean the interior of the heater.
- Do not attempt to open the heater casing at any time.

STORAGE

- Store the heater carefully in a dust-free area during the off season. It is ideal to store the heater in the carton it was supplied in. Neatly wind the cord of the heater to prevent damage to the cord.

WARRANTY GUIDELINES

1. Appliances will be free from defects in material and workmanship under normal use and service when installed and used in accordance with all applicable local laws and regulations.
 2. If, during the warranty period, a product fails to operate properly due to defects in workmanship or materials, Aber will either, at its option, repair or replace the product without charge to the purchaser.
- Incorrect installation or commissioning.
 - Incorrect electrical installation or fitment to an inappropriate supply. Any electrical installation (fitting and wiring of new wall sockets etc) must be performed by a qualified electrician.
 - The warranty applies only to the goods supplied and does not cover any other damage incurred.
 - No agent, representative, dealer or employee of Aber or any other person has the authority to increase or alter the obligations of Aber under these warranties.

The following circumstances or events are either deemed to be outside the scope of the general warranty policy as set out above, or will invalidate any warranty claim:

- Normal customer maintenance, including yearly maintenance, routine maintenance, lubrication, etc.
- Damage caused by the continued use of a product after a fault has occurred.
- Accident, Act of God, nature or war, theft, abuse, misuse, negligence or neglect, including improper installation.
- Failure to operate or maintain the product in accordance with the owner's manual furnished with the product.
- Any alterations or modifications, including those affecting the product's performance, operation, safety, durability or changes in its intended use.
- Additional damage to parts or components due to consented use occurring after any of the above conditions.

Proper Maintenance and Operation

The original purchaser must exhibit reasonable care in the maintenance and operation of the product as explained in the maintenance section of the owner/operator's manual. When in doubt, the Retailer should be contacted by the original purchaser for advice.

WARRANTY CLAIM PROCEDURES

Should a product failure occur then the original dealer should be contacted together with proof of purchase.

The following will apply to all products from date of purchase by the original consumer for use in a normal, domestic situation.

Portable Electric Heaters: 3 years from date of purchase.

Products used for business purposes will carry a 90 day warranty.
